Backend Development

Problem Solving

Objective

I'm looking for a position as a Web/Backend Developer (PHP/Laravel) or Android App Developer (Java) with a cutting-edge software firm. I want to work with a forward-thinking team to develop outstanding software solutions that will increase user engagement and company success. I have a solid background in programming and a dedication to innovation. My objective is to offer my knowledge and to keep developing in the ever-changing world of software development.

Projects

1. Novoneel

Description: "Novoneel" is a space-focused Android app developed in Java, integrating NewsAPI and YouTubeAPI for quick access to space news, videos, playlists, and live streams.

Technologies Used: Java, PHP, API

- This app was virtually selected in NASA Space App Challenge 2023

2. Quiz Application

Description: "Quiz App" for Android allows users to manage accounts, take category-based quizzes with 10 questions each, and view their rank on the leaderboard based on test scores.

Technologies Used: Java, PHP, MySQL

3. Virtual Library

Description: "Virtual Library" is an Android app for book lovers. Users create accounts, explore a variety of books, add favorites, and enjoy features like search and sorting by category. Account management includes updates and deletions.

Technologies Used: Java, PHP, MySQL

4. E-Commerce

Description: The e-commerce project allows users to search, add to cart, and make purchases. It includes automated emails for promotions and purchase confirmations. User and admin panels provide comprehensive control.

Technologies Used: HTML, CSS, Bootstrap, JS, PHP, MySQL

5. POS Application

Description: This is a multiuser application that many businesses can use it by creating profiles. Available features are product category listing, product listing, Sales and invoice generation, Business report generation, Profile management, and Customer management.

Technologies Used: Laravel, PHP, MySQL, JS, JQuery, Axios
